Final-year Software Engineering student focused on Data Engineering, backend systems, and data-driven architectures. Strong foundation in programming, databases, and software engineering principles, with hands-on experience in structured data workflows and scalable applications.

Built systems using Python, SQL, and modern web technologies, with exposure to API development, system design, and automation workflows. Currently seeking a Data Engineering internship to work on ETL pipelines, data processing systems, and scalable backend solutions.

TECHNICAL COMPETENCIES

• Programming & Scripting:

Python · SQL · JavaScript · TypeScript · C++ · PHP

• Data Engineering & Handling:

- ETL concepts (Extract, Transform, Load)
- CSV / JSON data processing
- SQL queries, joins, normalization
- Basic data pipeline understanding

• Data Visualization & BI Tools:

- Power BI (data dashboards and visualization)
- Matplotlib (basic visualization)

• Backend & Databases:

- Supabase (PostgreSQL backend)
- Relational database design
- API integration fundamentals

• Software Engineering Concepts:

- OOP (Object-Oriented Programming)
- System Design Basics
- SDLC & Agile methodologies
- CI/CD awareness

CORE SKILLS

- Problem Solving & analytical thinking
- Data-centric system design
- End-to-end project ownership
- Fast learning & tool adaptability
- Clean, structured, maintainable code

PROJECT

DevPilot – VS Code Extension (Final Year Project)

A **developer productivity** extension designed to automate workflows and improve coding efficiency.

- Built as a **modular VS Code extension**
- Focus on **automation & workflow optimization**
- Integrates directly into development environment
- Demonstrates **system design + backend integration**

EDUCATION

Bachelor of Science in Software Engineering

Lahore Garrison University

Final Year | Expected Graduation: 2026

NSCT Score | 91 Percentile

SOFT SKILLS & WORK ETHIC

Problem Solver

Breaks complex problems into structured solutions

Detail-Oriented

Focuses on clean data & accurate outputs

Team-Oriented

Effective collaboration in group projects

Resilient & Self-Driven

Keeps pushing through bugs and complexity

Growth-Focused

Always striving to level up through learning and feedback

LEARNING FOCUS

Python for data processing & automation

SQL optimization & query design

Data cleaning & transformation workflows

Real-world dataset exploration

Power BI dashboard development
